Age of Gunpowder Empires
1450 – 1800
Changed the balance of power

This term applies to a number of states, all of which rapidly expanded during the late 15th and over the entire 16th century. Most significant were Portugal, Spain, the Ottoman Empire, the Safavid Empire, and the Mughal Empire but also included England, France, Tokugawa (Japan), Romanov Russia, and Ming/Manchu (Qing) China.
Varying degrees of impact

- new gunpowder weapons had some impact in most parts of the inhabited world, but each place reacted differently.
- In China & Japan, for example, guns were allowed minimal influence
  - those countries kept themselves isolated, but then paid a high price, in the 19th century, by being vulnerable to the West.
- But while the West’s exploitation of gunpowder weapons enabled them to become wealthy & to dominate much of the globe, the effort cost countless lives & helped to keep Europe embroiled in war for much of modern history.
Japanese Reunification
Civil War and the Invasion of Korea and Manchuria, 1500–1603

- In the twelfth century, with imperial unity dissolved, Japan came under the control of a number of regional warlords called daimyo.
- Each daimyo had their own castle town, a small bureaucracy, and an army of warriors, the samurai.
- A long civil war would bring the separate Japanese islands under the control of different warlords.
Warfare among the daimyo was common, and in 1592 the most powerful of these warlords, Hideyoshi, chose to lead an invasion of Korea.

After Hideyoshi's death in 1598, the Japanese withdrew their forces and, in 1606, made peace with Korea.

- Control of the Daimyo

Tokugawa Japan, 1600-1867

Tokugawa Ieyasu (1543 – 1616)
Control of *Daimyo* ("Great Names")

- Approximately 260 powerful territorial lords
  - Independent militaries, judiciaries, schools, foreign relations, etc.
- From capital Edo (Tokyo), shogun requires "alternate attendance": daimyo forced to spend every other year at court
  - Controlled marriage, socializing of daimyo families
- Beginning 1630s, shoguns restrict foreign relations
  - Travel, import of books forbidden
  - Policy strictly maintained for 200 years
Economic Growth in Japan

- End of civil conflict contributes to prosperity
- New crop strains, irrigation systems improve agricultural production
- Yet population growth moderate
  - Contraception, late marriage, abortion
  - Infanticide: “thinning out the rice shoots”

Sources From The Past: Fabian Fucan Rejects Christianity

Why did the Japanese Buddhist Fabian Fucan first convert, then reject Christianity?

“I joined this creed at an early age; diligently, I studied its teachings, and pursued its practices. Due to my stupidity, however, I was long unable to realize that this was a perverse and cursed faith...”

Tradition and Change in East Asia

Summary

- East Asian states benefited from long-distance trade
- China remained the dominant power & centuries passed before China or Japan fell under European domination
- American food crops fueled population rise
- Japan unified under the Tokugawas & began its evolution into a powerful state
- Foreign relations closely controlled
- Vibrant economy promoted social change & enhanced status of merchants & artisans
Comparative Perspectives
Between 1500 and 1800, China and Russia grew dramatically, both in territory controlled and population. In comparison to Russia and China, the seaborne trading empires of the Portuguese, Dutch, French, and English had less territory, tighter administrations, and much more global sweep.
Despite being headed by an emperor, Japan's size, homogeneity, and failure to add colonies disqualify it from being called a true empire.

Japan and Russia made greater progress in improving their military than did the Chinese.

Of Japan, Russia, and China, Russia did the most to build up its imperial navy.
Cultural, Social, and Economic Comparisons

- As they expanded, both China and Russia pursued policies that tolerated diversity, while promoting cultural assimilation.
- While both Russian and Chinese leaders were willing to use foreign ideas and technologies, they tended to see their own culture as superior.
- Both China and Russia had hierarchical and oppressive social systems.
- Merchants occupied a precarious position in both China and Japan.
